

varieties, competence & service

# Marabel

early, high yielding quality ware potato

- early, high marketable yield
- very nice tubers
- very good table quality
- excellent suitability for pre-packing and peeling

# Marabel

early, high yielding quality ware potato

Variety characteristics			
<b>Maturity</b>	early	<b>Tuber</b>	Tuber shape Eye depth Skin Flesh colour Raw discolouration
<b>Cooking Type (EAPR)</b>	B		
<b>Consumption quality</b>	quality ware potato; very good taste; no discolouration after boiling; excellent suitable for packing and convenience products		
<b>Yield</b>	very high marketable yield; medium-large sized tubers	<b>Resistances</b>	Ro 1, Ro 4 high high - medium high high medium - high
<b>Youth development</b>	rapid		
<b>Dormancy</b>	medium; good storability	<b>Sensitivities</b>	Bruising Mechanical damage very low medium - low
Growing recommendations			
<b>Site requirements</b>	should be grown on soils in good agricultural condition. Uniform water and nutrient supply is advantageous. Soils with high risk of spraing (internal rust spots) should be avoided.		
<b>Planting</b>	planting density	approx. 39.000 plants/ha (seed size 35/55mm) => check QR Code for more details	
	planting depth	normal compared with local standard	
	seed preparation	normal compared with local standard	
	seed treatment	normal compared with local standard	
<b>Herbicides</b>	dose rates post emergence application should be avoided		
Fertilization		further information	
<b>Nitrogen</b>	medium - compared with local standard		
<b>Phosphorus</b>	100 kg/ha (at planting, water soluble phosphate)		
<b>Potassium</b>	200 - 250 kg/ha; in order to ensure dry matter content, potassium fertilization should be carried out with chloride-free fertilizer (potassium sulphate)		
<b>Magnesium</b>	60 kg/ha		

All particulars are based on official variety trials and/or our own experience. However, as potatoes are natural products we cannot undertake any liability for these details.
